DETAILED ACTION

Election/Restrictions

1. Claims 1-14 and 26-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 2-4-05.

Specification

2. The disclosure is objected to because of the following informality: reference to claim numbers on page 2, last two lines, should be corrected as necessary should the case issue.

Claim Objections

3. Claim 15 is objected to because "electric" (L 2) should be "electricity".

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 15-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 15 and 20 are indefinite when indicating hermetic sealing without the required sealing means. **Claim 16**, "said electric connection between said terminals" lacks antecedent basis". **Claim 18**, "said sensor" lacks antecedent basis.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless – (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 15-16 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishio et al. (JP 10-83843).

Claim 15, Nishio et al. teach connector system 20 for establishing electric and air connection between at least two wires 14 and 18 that allow for conduction of electricity and air, wires 14 and 18 being "air conductive wires". The system includes the followings:

(a) wires 14 and 18 having a shared terminal connected thereto (see drawings and English abstract), and

(b) connector assembly 22 for establishing electric and air connection between wires 14 and 18.

Assembly 22 is configured to establish air conduction path 25 hermetically sealed from the exterior (see English abstract).

Claim 16, Nishio et al. teach assembly 22 is sealed to tubes 13 and 19 which hermetically seals path 25 between wires 14 and 18 where assembly 22 contains the terminal within the path area. Electric connection is direct to the terminal. **Claim 19**, Nishio et al. teach at least one more electric wire making up the structure which is considered a harness in that such is formed into a single unit to hold wires 14 and 18 and the other items.

Allowable Subject Matter

8. Claims 17-18 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 20-25 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

9. The following is a statement of reasons for the indication of allowable subject matter:

claim 17: the prior art does not teach wire 14 or 18 being adapted for air-conductivity connecting to a sensor,

claim 18: the prior art does not teach that assembly 22 is connected under electric and air connection to a control unit for a sensor, and

claim 20: the prior art does not teach a sensor connected to wire 14 or 18 where assembly 22 is further connected with a sensor control unit under electric and air connection.

10. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
